

24 HOUR FACILITIES

SEADOWN
VETERINARY SERVICES

Seadown Veterinary Group provides its own 24-hour emergency service. This is manned by our own vets and nurses throughout the year including weekends and bank holidays and operates from the Hythe hospital.

Whether you are a client at Hythe, Totton or Lymington, our computer system can access your pet's clinical history and details of any previous treatment or medications prescribed.

If you have an emergency or need urgent advice, please contact the surgery on 023 80842237 (working hours) or 023 80841424 (out of hours). A veterinary nurse will then discuss things over the phone and make arrangements for your pet to be seen if required.

Our hospital at Hythe is manned around the clock, where we care for any inpatients and see urgent or emergency cases.

Animals may be admitted to the hospital because they need surgery or treatment which cannot be provided in your own home, such as intravenous fluids or intensive nursing. We have an isolation kennels which enables us to separate animals with potentially infectious conditions. Our on-site laboratory means we can carry out blood tests and further investigation quickly and easily. We aim to provide a convenient, efficient service to all of our clients in the Waterside area, New Forest and beyond.

Delivering first-class veterinary care to the New Forest since 1923
